HTML Practice Test

Exercise 1. Write HTML code

Write the HTML code needed to perform the following tasks:

a) Write the necessary `meta` tags to:

- Specify UTF-8 character encoding.
- Make the webpage adapt to the device's screen width.
- Provide a description of the webpage: "Blog dedicated to video games".

b) Display an image named `videojuegos.jpg`, located inside the `imagenes` folder. The image must include appropriate alternative text.

c) Create an unordered list with the following items:

- Minecraft.
- Roblox.
- Fortnite.
- Rocket League.

Exercise 2. Create an HTML table

Write the HTML code needed to create a table with the following information:

Product	Price	Availability
Keyboard	€25	Available
Mouse	€15	Out of stock
Monitor	€120	Available

Requirements:

- The table must have the caption "Computer Products".
- The first row must contain table headings.
- Use `thead` and `tbody` to organize the table.
